Re: Application for a grant towards the restoration of the lens

Dear Sir or Madam,

The station was modernised in stages. A clockwork rotation mechanism replaced the hand-cranked one in 1902, an acetylene burner arrived in 1923, and electricity followed in 1951, carried across the sound on a cable that the fishermen swore would never hold.

Today the tower belongs to a foundation that opens it to the public in summer. The log books have been scanned, transcribed and indexed, and a small exhibition in the old oil store shows the lamp, the auger and a page from the winter of 1893.

We would be grateful for your support and are happy to provide any further information.

Yours faithfully,

Ingrid Nordvik
Chair of the board
