Portrait A4

The lighthouse at Skarvik was lit for the first time on a wet October evening in 1871, and for almost a century afterwards the same family kept its lamp burning. Their log books survive in the town archive: eleven volumes of weather, ships, repairs and the occasional complaint about the price of paraffin.

Most entries are short. Wind from the south-west, fresh; visibility good; two steamers northbound before midnight. But every few pages the keeper allowed himself a sentence more, and those sentences are the reason people still read the logs today.

Landscape A4

Structure	Material	Built	Length (m)	Cost (MNOK)	Condition
North pier	Concrete	1954	212	18.4	Good
South pier	Timber	1931	148	9.7	Fair

Fuel jetty	Steel	1995	48	6.5	Good
Lifeboat ramp	Concrete	1979	38	3.3	Poor
East breakwater	Rock armour	1926	410	54.0	Fair
West breakwater	Rock armour	1926	355	47.8	Good
Total			1808	223.9	

A5

In the winter of 1893 the ice reached the outer skerries, something no one in the village had seen before. The keeper walked across to the nearest island with his son, measured the ice with an auger and wrote that it was thicker than the kitchen table and twice as level.
